

Belgian genset manufacturer Europower now represents Belgian IBC fuel container manufacturer Tolsma Tanbouw.

European Rental Association (ERA)

Central area

The European Rental Association (ERA) has a stand right in the middle of the exhibition hall, and this space will also serve as the refreshments area for delegates to the ERA convention. It will be the ideal networking point for visitors.

Europower Generators/Tolsma Tankbouw 450

Belgian genset manufacturer Europower is busy developing a new range of large gensets. At Bauma last year it showed its first 250 kVA unit, and at the IRE show it will show models from its new range of 60 - 250 kVA generators. Assembled in Belgium, these are rental specification models, with 30 hour running fuel capacity; special 'rental power connectors' for direct power connection; compact

This 100 kVA genset is the latest in Europower's new range of large output generators.

dimensions and galvanized chassis; and noise levels of just 95 LWA on the 100 KVA model. Customers can choose between Mecc Alte or Leroy Somer alternators. The company also now represents Tolsma Tanbouw, the Belgian manufacturer of IBC transport containers for fuel and oil.

Euro Towers

812

Euro Towers is a leading manufacturer of aluminium mobile access towers and low level access units. Its products are sold throughout the world and its aluminium towers are approved to TUV DIN EN1004.
